DESCRIPTION

CREEPER-LUBE is a versatile semi-fluid lubricant that utilizes a highly refined petroleum base oil, an aluminum complex soap thickener and organic additives resulting in a product that provides good pumpability, wide temperature service, high water resistance, and extreme pressure and anti-wear properties.

The semi-fluid viscosity allows **CREEPER-LUBE** to flow and circulate easily in gear box applications as well as into the pins and bushings of chains, roller bearings and guide pin sleeves on machine tools. The thickener reduces leakage in applications where oil will not stay put.

APPLICATIONS

For gear and chain cases, speed reducers and transfer cases where leakage, noise or wide temperature variations are present. The semifluid consistency makes it serviceable for automatic central lubricating systems designed for fluids such as chassis lubricators in trucks, in forklifts, and printing equipment. It can also be utilized effectively in cotton spindles, track rolls, trailer landing gears, gang mower drives, etc.

OPERATING RANGE

-32°C to 177°C (-25°F to 350°F)

PRODUCT SPECIFICATIONS
