DESCRIPTION

EZY-OPEN™ Valve Penetrant is designed to penetrate scale, rust, corrosion and old oxidized hardened valve lubricants which can disable or make valves extremely difficult to operate. **EZY-OPEN** is a soft gel specifically formulated from a select group of nonflammable, nontoxic and biodegradable fluids capable of softening or dissolving valve lubricants and sealants, residual gums, lacquer, scale and corrosion deposits.

In addition to the fluids selected, **EZY-OPEN** contains a powerful dispersant and detergent to aid in the removal of gum and lacquer, metal wetting agents to aid in the penetration of scale and rust, and Teflon* to reduce the torque required to break the valve free. When the valve operates freely, the appropriate EZY-TURN Valve Sealant product should be injected into the valve to provide long term lubrication and sealing.

APPLICATIONS

EZY-OPEN Valve Penetrant is designed to penetrate and lubricate disabled or hard to operate lubricated valves. Excellent for use in any injectable assembly to aid in disassembly.
