LITHIUM SOAP THICKENED/SILICONE GREASE

EP Greases

DESCRIPTION

JET-LUBE[®] NO. 33 is premium silicone/lithium grease for use in a wide variety of applications. Its low volatility and low temperature properties allow the product consistency to remain constant over a wide temperature range. **JET-LUBE NO. 33** is excellent for ball and roller bearings under light loads; plastic and rubber parts; small gears and applications requiring oxidation resistant lubrication. Since it has low torque requirements, **JET-LUBE NO. 33** is especially effective in equipment that must start in extremes of cold.

In the higher NLGI grades, **JET-LUBE NO. 33** can provide excellent lubrication and sealing properties for plug and gate valves, stuffing boxes, o-rings, vacuum and pressure systems. The thickener is a lithium 12-hydroxystearate soap which provides better oxidation resistance and shear stability than the older lithium stearate soap technology. It is not recommended for use on surfaces to be painted.

- Excellent for high temperature bearings, conveyor systems, and low-temp refrigeration systems
- Water resistant
- Nontoxic/Safe
- Wide temperature range
- Chemical resistant
- Opaque paste
- Highly resistant to oxidation and shear breakdown
- Suitable for valve lubrication
- Conforms to CID A-A-59173, Type 2 (formerly MIL-G-46886B)
