

RUBBER LUBRICANT™

WATER-BASED, MOLD RELEASE AGENT

Penetrants & Coatings

DESCRIPTION

JET-LUBE'S Water-Based RUBBER LUBRICANT and MOLD RELEASE AGENT is a multi-purpose, environmental safe silicone product that provides unsurpassed performance. Contains twice the silicone content of leading aerosols for increased protection.

When used as a **RUBBER LUBRICANT**, it makes assembly of plastic and rubber parts fast and easy. Whether squirted, sprayed or brushed on, **RUBBER LUBRICANT** provides a temporary, wet, slippery surface, and then either dries to a thin protective film, or is absorbed into natural or synthetic rubber.

As a **MOLD RELEASE AGENT**, extra heavy silicone content provides maximum release capacity under even the most severe mold conditions. Excellent for all metal, plastic and rubber castings. Heat stable to 260°C (500°F). Non-flammable. Will not melt or gum.
